

Saint Luke's Little Saints Science Class

Imagine That!

Saint Luke's Little Saints
SAINT LUKE'S PRESBYTERIAN CHURCH

Fall 2021

Miss Jennie

Welcome to Miss Jennie's Science class! This year we will use our monthly study units to explore a variety of Science topics!

For October, we will talk about leaves, the moon & skeletons as Autumn is the season of falling leaves, a beautiful moon & lots of Halloween fun.

For November, we will talk about plants and the ocean since the Pilgrims learned to plant their own food and came to a new country via the ocean.

For December, we will talk about farm animals and the stars to remind us that Jesus was born in a manger. The Shepherds, their sheep, & the three Wise Men followed the star to worship Him.

USE YOUR IMAGINATION!

The Science Room has been set up for maximum imagination play! Each Science class has time for our Little Saints to explore and play with each other. From a puppet show to many different building blocks, our Little Saints love to engage with each other in this classroom! Please stop by to check out the room!
